## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Katrina Lyon on 5/6/08.

#### **The application has been amended as follows:**

- Claim 1, line 10, after the word "new" insert "2D".
- Claim 1, lines 15, after the word "image" insert "wherein a transfer of pixels from said source image to said composite image is based on a one-to-one correspondence regardless of whether the user initiates pixel transfer from the source image or the composite image"
- Claim 16, line 12-13, delete the phrase "apply at least one filter to the image stack to create at least one intermediate images" and insert "applying one or more filters to the image stack to create one or more new 2D intermediate images"
- Claim 16, lines 16-17, delete the phrase "select portions from the source image to be added to a composite image to create a final composite image" and insert ""selecting pixels from the source image to be added to a composite image to create a final composite image, wherein a transfer of pixels from said source

image to said composite image is based on a one-to-one correspondence regardless of whether the user initiates pixel transfer from the source image or the composite image”.

- Claim 28, line 8, after the word “create” insert “one or more new 2D”.
- Claim 28, line 11, delete the phrase “select pixels from the source image to create a final composite image” and insert “selecting pixels from the source image to be added to a composite image to create a final composite image, wherein a transfer of pixels from said source image to said composite image is based on a one-to-one correspondence regardless of whether the user initiates pixel transfer from the source image or the composite image”
- Claim 29 is amended as follows: “A graphical user interface displayed on a display device for creating a composite image, comprising: a source image window for displaying a source image derived from an image stack comprised of a stack of separate, non-layered original images, each separate non-layered image being taken at a distinct time and from the same point of view, wherein the pixel position of each original image in the image stack is defined in a three dimensional coordinate system, and wherein two dimensions of the three dimensional coordinate system describe the dimensions of each image in the image stack, and the third dimension describes a time a different image was captured;  
an intermediate image created by said user by applying at least one filter to the image stack and uses said intermediate image as a source image, wherein

applying one or more filters to the image stack creates one or more 2D intermediate images; and

a composite image window wherein a composite image is displayed that is composed of parts of said source image that are transferred from the source image to the composite image by a user.

wherein said transfer of pixels from said source image to said composite image is based on a one-to-one correspondence regardless of whether the user initiates pixel transfer from the source image or the composite image."

- Claims 30 and 32 are canceled.

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 16, 28, and 29 when considered, as a whole in light of the specification, is allowable over the prior art of record. Specifically, prior art of record fails to teach or suggest the limitations of "inputting an image stack comprising a stack of non-layered, separate original images, each original image taken at a distinct separate time from the same point of view, wherein the pixel position of each original image in the image stack is defined in a three dimensional coordinate system, and wherein two dimensions describe the dimensions of each image in the image stack, and the third dimension describes the time an image was captured."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
